Valeriia Kozak

Quality Assurance Engineer | Driving Efficiency in Testing
San Francisco Bay Area

Summary

As a QA Engineer with over 3 years of experience, I focus on
enhancing user experiences across web and mobile platforms.
With expertise in functional and non-functional testing and a solid
understanding of the SDLC and STLC, I aim to deliver high-quality
products.

I'm known for being a reliable team member who approaches my
work with dedication and enthusiasm. I enjoy staying organized and
value open communication with my teammates.

Technical Skills:
• Web Technologies: HTML, CSS
• Mobile Testing Tools: Android Studio, TestFlight, Xcode
• Databases: MySQL
• Bug Tracking Tools: JIRA
• Test Case Management Tools: TestRail, XRAY
• API Testing Tools: Postman, Swagger

_____

Experience

Playball
QA Engineer
October 2022 - Present (2 years 1 month)
Los Angeles, California, United States

• Collaborate with cross-functional teams, including developers and product
managers, to align on project objectives and ensure the timely delivery of high-
quality software.
• Leverage Jira within an Agile environment to optimize task management and
enhance team collaboration, fostering an efficient workflow.
• Design and implement detailed test plans and test cases based on user and
business requirements, strengthening the overall testing framework.

• Perform a variety of testing activities, including functional, regression, smoke, integration, and user acceptance testing (UAT) on web applications using automation tools like Cypress, resulting in a 40% decrease in critical defects.
• Improve defect tracking and reporting workflows with Jira and TestRail, successfully addressing over 400 defects and leading to smoother release processes.
• Conduct API testing with Postman and JavaScript, resulting in fewer API endpoint issues and a significant reduction in the time required for bug identification, ultimately enhancing the user experience.

Convoy Inc
QA Engineer
